Student's Feedback UNIVERSITY

Let's get to know each other better!

The following document contains personal information of our students.

Please use this information in a responsible manner.

All students listed here agreed to get contacted by interested students, unless testimony is anonymous.

So, feel free to contact past exchange students or email us for further questions.

Student's Details

Full Name	Theo Adrai
Email	theoad@campus.technion.ac.il
Host University	Carnegie Mellon University
Period of Exchange	Fall 2018
Technion home Faculty	Computer Science
Faculty at Host University	School of Computer Science
Number of courses taken abroad	3

Courses feedback

I took overall 3 courses. I wanted to take more but the courses I took were called "system course" which means they came with super heavy load. Level of the final exam: medium (easier than Technion). Level of Assignments: extremely advanced (way way harder than Technion).

Campus life, activities, culture, etc.

Nice campus, great sport center. The city is a bit boring. Not a lot to do. People in the university are super ambitious. Good if you want to learn a lot. Bad if you want to have the classical "American student experience"

General feedback

Awesome experience. I learned more in one semester than in a year at Technion. Studies are super hard but it pays off back in Israel. Take good winter gear... US winter is no piece of cake ;)

Tip for future outgoing students

They can obviously get in touch to talk about the studies. My message would be: Prepare yourself for hard assignments. Technion computer science wets are a joke compared to CMU system courses.
